Insider Threat Program Development - Management Web Based Training Course

Student Comments

Jim

The Insider Threat Program (ITP) Development-Management web based training provided me with just the knowledge and resources I needed to start developing my ITP. This training was extremely affordable. The templates provided, allowed me to save countless hours writing an ITP manual, policy and related documents. I thought I had a pretty good understanding of the insider threat problem. WoW, what I didn't know could have been very costly and damaging to my company. I feel very confident I can create and effective ITP to detect and mitigate insider threats.

Mr. Henderson

Delvon and I have spent the last week finally getting to deep dive into the resources you provided during the training and establish a plan. Our overarching response is this training was *EXTREMELY* valuable! I doubt we could have ever established a sufficient or robust Insider Threat Program without your guidance and resources you've provided to date - just fantastic! I look forward to sharing your contact information with our business partners and highly recommend your services.

Attached is my student eval form. A wealth of knowledge and excellence across the board. I have no complaints other than I have a lot of information to sort through! :-)

Thank you for allowing our office to participate in the training session, it was very informative and useful. I think you have a successful program and it is going to be great for other security professionals to have this available to them.

This course was *excellent* and you provided more than enough information for a new Insider Threat Program Senior Official (ITPSO) to start a program, and for an ITPSO with an existing and robust program to have a wealth of additional information to build on what they already have. I will be taking time to review everything that you sent to us and figure out how to build some of it into our program.
